Abby,

Thank you for your response. We are checking with the Regional Air Quality Council (as the lead planning agency for ozone in the DMA) today to determine who will be drafting the letter. We have all been discussing these events extensively so if you are ok with it, I can pass your email along to the relevant staff once we know who will be sending the letter. Thanks again for working with HQ to get a response on this!

Hi Lisa,

I finally have a response regarding your timing questions below. The request for extension should be sent to EPA prior to the July 20, 2018 attainment due date. The exceptional events demos should be sent to EPA ASAP, but no later than simultaneously with the extension request letter. The language in the extension request should indicate that the request for extension is conditionally based on EPA's concurrence with the EE demos.

Please let me know if you have any other questions.

Do you know who will be drafting the extension request letter? I want to be sure they are aware of the timing and language we're requesting regarding referring to the EE demos.

Hi Lisa,

I touched base with HQ today and they have a draft response that is being reviewed. They anticipate responding to me this week so I will hopefully have your questions regarding timing answered by the end of this week.

Lisa,

I am verifying with headquarters submission deadlines for the extension request letter and exceptional events demonstrations. I sent the question out this morning so hopefully I'll hear back from them later today or early tomorrow. Sorry for the delay but I want to be sure to give you accurate due dates. I'll let you know as soon as I hear back from HQ. Let me know if you have any other questions in the meantime.

Thank you.

Subject: timing to submit Exceptional Event demonstrations for ozone

Hi Abby,

I am checking in to gather your thoughts on when you think Colorado needs to submit our Exceptional Events demonstrations so that we can show that 2017 is a clean data year. Should this information be submitted before our request letter (due 7/20/2018) or could this process be simultaneous? It's my understanding that EPA has six months to concur/not concur on the demonstrations and six months to agree/disagree with our request. I just want to make sure we are all aware on this because the two items are related - without a concurrence on the Exceptional Events demonstrations (9/2/17 and 9/4/17), the data is not clean for 2017 and the request cannot be granted. Let me know if you want to discuss further, I'm happy to chat.

Thanks,

Lisa
